Chapter 1: Getting started with angularjs-ng-repeat

Remarks

This section provides an overview of what angularjs-ng-repeat is, and why a developer might want to use it.

It should also mention any large subjects within angularjs-ng-repeat, and link out to the related topics. Since the Documentation for angularjs-ng-repeat is new, you may need to create initial versions of those related topics.

Examples

Installation or Setup

Detailed instructions on getting angularjs-ng-repeat set up or installed.

AngularJS ng-repeat introduction and challenges

ng-repeat is the built-in directive provided by AngularJS, mostly used for listing the array elements on UI dynamically as per the changes in our model.

Official "ng-repeat" docs can be found at : <https://docs.angularjs.org/api/ng/directive/ngRepeat>

Also the most common error faced while implementation of ng-repeat is given here: <https://docs.angularjs.org/error/ngRepeat/dupes>

For new comers the angularjs docs(quite informative but) might not be as descriptive but here's another link to make our understanding clear about the ng-repeat, it shows the code implementation of ng-repeat and also the challenges that come with it if not used properly: <https://blog.rjmetrics.com/2015/09/02/8-features-of-ng-repeat>

Trying out ng-repeat with different types of array data would be beneficial to understand it more profoundly.
