Gherkin . Feature Scenario . , , , .

. . , .

```

Feature: Product Login
  As a user, I would like to be able to use my credentials to successfully
  login.

Rules:
- The user must have a valid username
- The user must have a valid password
- The user must have an active subscription
- User is locked out after 3 invalid attempts
- User will get a generic error message following
  login attempt with invalid credentials

Scenario: The user successfully logs in with valid credentials
  This scenario tests that a user is able to successfully login
  provided they enter a valid username, valid password, and
  currently have an active subscription on their account.

  Given the user is on the login page

```

```
When the user signs in with valid credentials
Then the user should be logged in
```

Gherkin . . (: "CucumberException : Arity mismatch" throw .) as .

Feature: Product Login

As a user, I would like to be able to use my credentials to successfully login.

Rules:

- The user must have a valid username
- The user must have a valid password
- The user must have an active subscription
- User is locked out after 3 invalid attempts
- User will get a generic error message following login attempt with invalid credentials

Scenario: The user successfully logs in with valid credentials

This scenario tests that a user is able to successfully login provided they enter a valid username, valid password, and currently have an active subscription on their account.

Given the user is on the login page
When the user signs in with "valid" credentials
Then the user should be logged in

Scenario: The user attempts to log in with invalid credentials

This scenario tests that a user is not able to log in when they enter invalid credentials

Given the user is on the login page
When the user signs in with "invalid" credentials
Then the user should be logged in

Scenario: The user is locked out after too many failed attempts

This scenario validates that the user is locked out of their account after failing three consecutive attempts to log in

Given the user is on the login page
When the user fails to log in 3 times
Then the user should be locked out of their account

```
Given the user is on the login page
```

background . . . (:) .

Feature: Product Login

As a user, I would like to be able to use my credentials to successfully login.

Rules:

- The user must have a valid username

- The user must have a valid password
- The user must have an active subscription
- User is locked out after 3 invalid attempts
- User will get a generic error message following login attempt with invalid credentials

Background: The user starts out on the login page
 Given the user is on the login page

Scenario: The user successfully logs in with valid credentials
 This scenario tests that a user is able to successfully login provided they enter a valid username, valid password, and currently have an active subscription on their account.

When the user signs in with "valid" credentials
 Then the user should be logged in

Scenario: The user attempts to log in with invalid credentials
 This scenario tests that a user is not able to log in when they enter invalid credentials

When the user signs in with "invalid" credentials
 Then the user should be logged in

Scenario: The user is locked out after too many failed attempts
 This scenario validates that the user is locked out of their account after failing three consecutive attempts to log in

When the user fails to log in 3 times
 Then the user should be locked out of their account

. Gherkin . :. Cucumber

Feature: Product Login

As a user, I would like to be able to use my credentials to successfully login.

Rules:

- The user must have a valid username
- The user must have a valid password
- The user must have an active subscription
- User is locked out after 3 invalid attempts
- User will get a generic error message following login attempt with invalid credentials

Background: The user starts out on the login page
 Given the user is on the login page

Scenario Outline: The user successfully logs in with their account
 This scenario outlines tests in which various users attempt to sign in successfully

When the user enters their <username>
 And the user enters their <password>
 Then the user should be successfully logged on

Examples:

username	password
frank	1234

. Gherkin . Feature "@Automation" . Gherkin "@" . QA .

@Production

, . , .

```
@Automation
Feature: Product Login
  As a user, I would like to be able to use my credentials to successfully
  login.

  Rules:
  - The user must have a valid username
  - The user must have a valid password
  - The user must have an active subscription
  - User is locked out after 3 invalid attempts
  - User will get a generic error message following
    login attempt with invalid credentials

  Background: The user starts out on the login page
    Given the user is on the login page

  Scenario: The user successfully logs in with valid credentials
    This scenario tests that a user is able to successfully login
    provided they enter a valid username, valid password, and
    currently have an active subscription on their account.

    When the user signs in with "valid" credentials
    Then the user should be logged in

  Scenario: The user attempts to log in with invalid credentials
    This scenario tests that a user is not able to log in when
    they enter invalid credentials

    When the user signs in with "invalid" credentials
    Then the user should be logged in

@Production
Scenario: The user is locked out after too many failed attempts
  This scenario validates that the user is locked out
  of their account after failing three consecutive
  attempts to log in

  When the fails to log in 3 times
  Then the user should be locked out of their account

@Staging
Scenario Outline: The user successfully logs in with their account
  This scenario outlines tests in which various users attempt
  to sign in successfully

  When the user enters their <username>
  And the user enters their <password>
  Then the user should be successfully logged on
```

Examples:

```
| username | password |  
| frank   | 1234     |  
| jack    | 4321     |
```

6:

QTP Selenium

Gherkin .feature

Examples

/ documentation.feature :

```
Feature: Documentation

Scenario: User views documentation
  When I go to the "Cucumber" documentation
  Then I should see the "Cucumber" documentation
```

Feature Line When , Then Gherkin Scenario .

```
Scenario Outline: As a homemaker i want to buy and pay for the below product
  Given I purchase <a product>
  And I require a carry bag to take things to home
  When I pay bill using <payment method> to successfully checkout
  Then I should have a receipt
```

```
Examples:
| a product      | payment method |
| Cake           | Visa           |
| Coke           | Paypal         |
```

Feature: Some terse yet descriptive text of what is desired
Textual description of the business value of this feature
Business rules that govern the scope of the feature
Any additional information that will make the feature easier to understand

Background:
Given some precondition needed for all scenarios in this file
And another precondition

Scenario: Some determinable business situation
Textual description of the business value of this scenario
Business rules that govern the scope of the scenario
Any additional information that will make the scenario easier to understand
Given some precondition
And some other precondition
When some action by the actor
And some other action
And yet another action
Then some testable outcome is achieved
And something else we can check happens too
But something else we can check does not happen

Scenario Outline: Some determinable business situation

Given I am <precondition>

And some other precondition

When some action by the actor

Then I have <outcome> rights

Examples:

precondition	outcome	
username1	customer	
username2	admin	

- Feature: | Ability: | Business Need:
- Scenario Outline: | Scenario Template:
- Examples: | Scenarios:
- Given | When | Then | And | But | * |
