Examples

◦

Hibernate pom.xml dependencies

```
<dependency>
    <groupId>org.hibernate</groupId>
    <artifactId>hibernate-core</artifactId>
    <version>5.2.1.Final</version>
</dependency>
```

1.

Eager Loading◦

◦ ◦

2.

XML

```
lazy="true"
```

◦ User

```
public class User implements Serializable {

    private Long userId;
    private String userName;
    private String firstName;
    private String lastName;
    private Set<OrderDetail> orderDetail = new HashSet<>();

    //setters and getters
    //equals and hashCode
}
```

orderDetail◦ OrderDetail

```
public class OrderDetail implements Serializable {

    private Long orderId;
    private Date orderDate;
    private String orderDesc;
    private User user;

    //setters and getters
    //equals and hashCode
}
```

```
}
```

UserLazy.hbm.xml

```
<set name="orderDetail" table="USER_ORDER" inverse="true" lazy="true" fetch="select">
    <key>
        <column name="USER_ID" not-null="true" />
    </key>
    <one-to-many class="com.baeldung.hibernate.fetching.model.OrderDetail" />
</set>
```

◦ lazy = "false" ◦ **User.hbm.xml eager**

```
<set name="orderDetail" table="USER_ORDER" inverse="true" lazy="false" fetch="select">
    <key>
        <column name="USER_ID" not-null="true" />
    </key>
    <one-to-many class="com.baeldung.hibernate.fetching.model.OrderDetail" />
</set>
```

SessionFactorySession ◦ **Eager** ◦ ◦ **POJO**

```
@Entity
public class User {
    private int userId;
    private String username;
    @OneToMany
    private Set<Page> likedPage;

    // getters and setters here
}

@Entity
public class Page{
    private int pageId;
    private String pageURL;

    // getters and setters here
}

public class LazzyTest{
    public static void main(String...s){
        SessionFactory sessionFactory = new SessionFactory();
        Session session = sessionFactory.openSession();
        Transaction transaction = session.beginTransaction();

        User user = session.get(User.class, 1);
        transaction.commit();
        session.close();

        // here comes the lazy fetch issue
        user.getLikedPage();
    }
}
```

lazyInitializeException ◦ **oneToMany DB** ◦ **preferPageDB** ◦
