    On small and extra small devices, the viewport will render TWO cells
    (12 / 6 = 2), so we need a clearfix every TWO cells. We also need to
    say "don't show this clearfix when the viewport will render FOUR cells",
    which it will do at medium size (12 / 3 = 4). We do that by adding
    hidden-md and hidden-lg to our clearfix div, in effect instructing the
    browser to not show it at all on a wider screen.
