Chapter 1: Getting started with win-universal-app

Remarks

To develop and create universal app package. choose VS 2015 and installed Developer SDK.

Versions

Version 1.0 Release Date: 21st Oct-2016

Examples

Installation or Setup

We have 2 way, we can install Universal app in windows 10 devices (OS/Phone). One app works for both mobile and OS

1 Install using Power Shell command

Step 1: Make sure app not have any error and developed, then right click on Universal app project in solution explorer.

Step 2: Select **Store** and Choose **Create App Package** option

Step 3: Select **No** and click Next, here choose architecture x86 and x64 bit or choose as per your requirement.

Select and Configure Packages

Output location:

D:\Projects\JOIN8POS\1. Source Code\Join8POSSolution\JOIN8POS\JOIN8POSShopApp2.Universal\AppPackages\

Version:

3 . 3 . 38 . 0

☒ Automatically increment

[More information](#)

Generate app bundle:

Always

[What does an app bundle mean?](#)

Select the packages to create and the solution configuration mappings:

	Architecture	Solution Configuration
<input type="checkbox"/>	Neutral	Debug (Any CPU)
<input checked="" type="checkbox"/>	x86	Debug (x86)
<input checked="" type="checkbox"/>	x64	Debug (x64)
<input type="checkbox"/>	ARM	Debug (ARM)

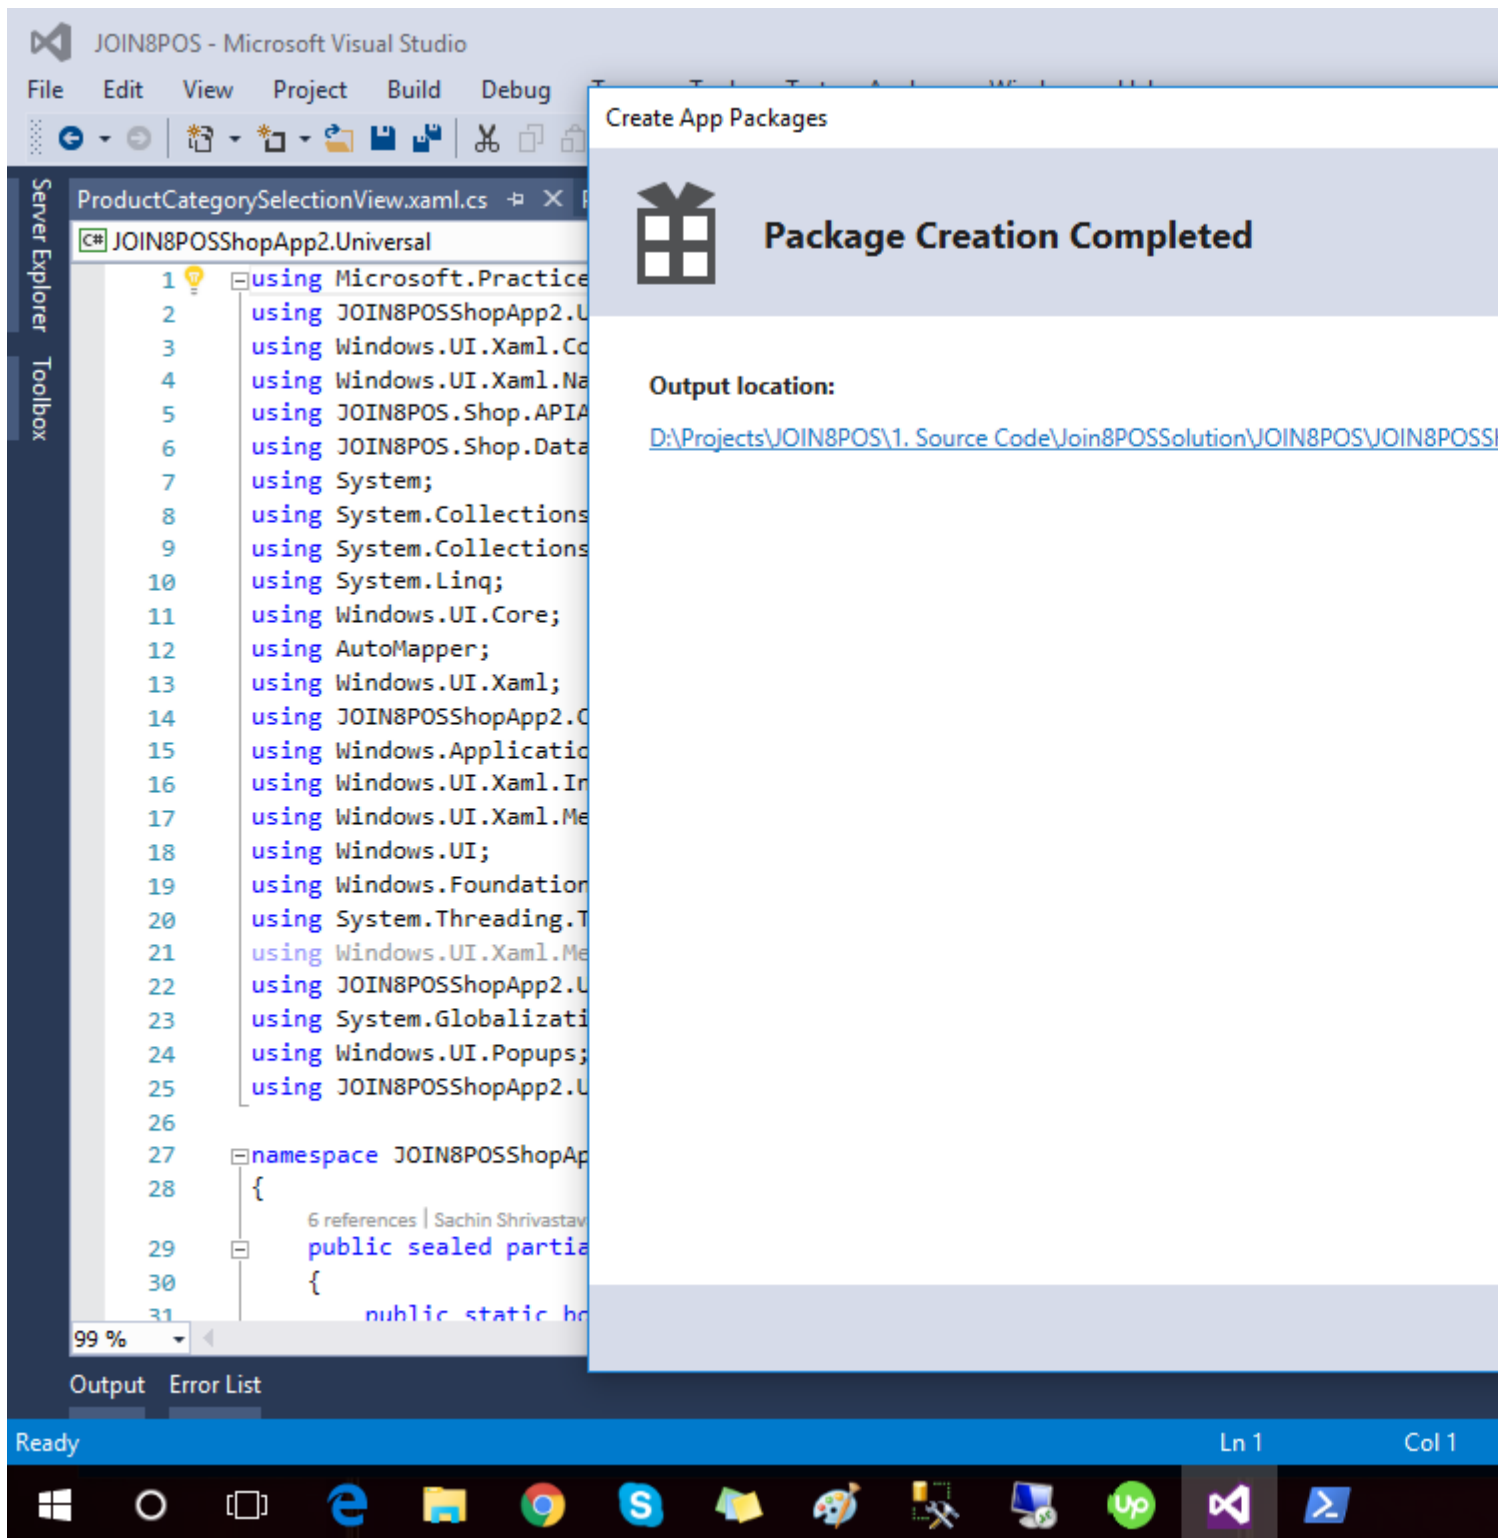

i To run validation locally, you must select at least one solution configuration that is both non-Debug and contains an architecture that runs on the local machine.

☒ Include full PDB symbol files, if any, to enable crash analytics for the app. [Learn More](#)

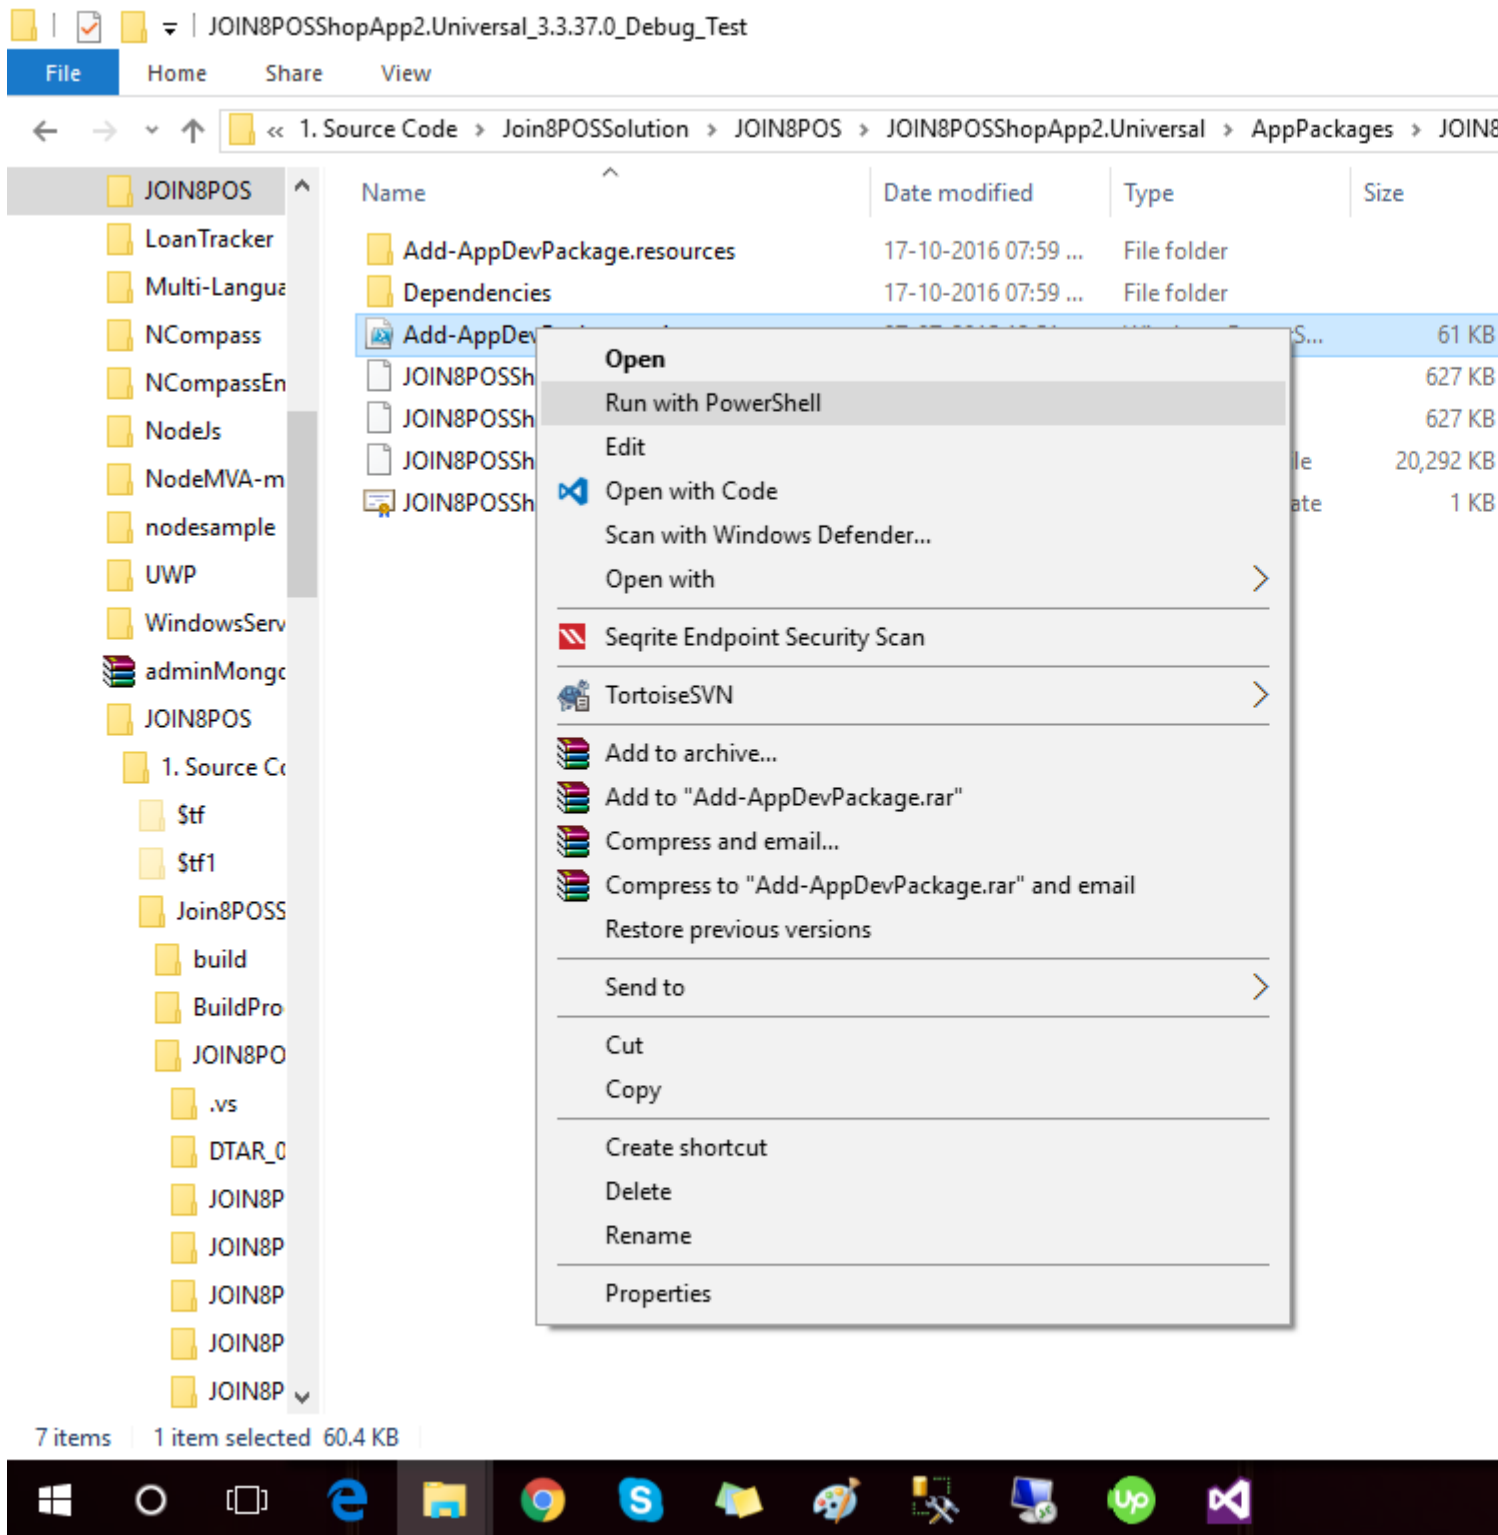

Previous

Create

Cancel

Step 4: Click **Create** , it create App Packages and open App Package folder and run ps1 file right click and **Run as Power Shell**

It will ask for confirmation "Y" or "N" press Y in power shell console. Installation ask for certification installation, for that choose "Y" and let certificate install, then app installation will start. on it done. find all in start menu of PC.
